

# Rainbow Caterpillar

A strong wind is blowing through the caterpillar making factory on the top of the hill and as a result of this the Rainbow Caterpillar has been scattered all over the area. Your task this afternoon is to complete challenges to earn stickers that will be exchanged for equipment to make your very own

Before you start the challenge you will need to make a butterfly necklace to wear and you will use this to place your stickers on after you successfully complete each challenge.

You will need to complete a minimum of 8 Challenges, the more challenges you complete the longer your caterpillar will be.

The most stickers that can be collected is 16, but you can if you have time complete all 20 challenges.
